

The Roswell Incident

In June 1947, an Idaho pilot reported seeing a string of nine shiny unidentified flying objects flying past Mount Rainier at speeds of 1,200 miles an hour.

One week later, something crashed near Roswell, New Mexico (population 25,000). An experimental aircraft? A weather balloon? A secret military project?

Or something else?

Two days later and Roswell has visitors. It is noon, July 3, 1947.

Welcome to *The Roswell Incident*, where we discover what really happened in Roswell. Why did the US Army and FBI arrive in Roswell? What happened on the Turner ranch? What did crash outside Roswell?

Welcome to Roswell!

RAAF EXPANSION PLANNED

An expansion of Roswell Army Air Field starts next month with the addition of a new runway and hangars for advanced jets.

RAAF is already home to the 509th Bombardment Wing of Strategic Air Command. The 509th flies the trusty Boeing B-29 Superfortress, which dropped the atomic bomb on Japan and ended the Second World War.

The new facilities are expected to be home to the 33rd fighter group (currently flying the famous P-51 Mustangs). In addition, the 33rd is expected to fly advanced jet fighters such as the Lockheed P-80 Shooting Star.

The new runway will be 13,000 feet long, and an additional five miles of perimeter fencing will be required. Construction is expected to start next month and take eighteen months.

Additional hangers, offices, quarters, and state-of-the-art research facilities will be constructed along with the runway.

Mayor Weinrib said, "This expansion will put Roswell on the map, and we welcome all the new personnel and construction workers."

SHERIFF'S DOG EATS DOUGH

Sheriff Jackson's dog, Monty, was treated by Dr. Blake yesterday after the three-year-old golden retriever ate two pounds of bread dough. The dough was proving in the Sheriff's pantry when the greedy dog pushed open the pantry door and ate the dough.

"These things happen every now and again," said Dr. Blake. "We just have to wait for nature to take its course."
